

# Extron CERTIFIED CONTROL SPECIALIST

Extend Your Ability to Customize and Manage  
Control Systems Across the Enterprise

- Learn the best practices of user interface design
- Create custom TouchLink™ user interfaces using resources and style kits
- Develop advanced control system configurations for more complex environments
- Manage and maintain multiple A/V resources using Extron GlobalViewer® Enterprise
- Expand your understanding of the benefits of networked A/V systems
- Achieve industry recognition for you and your company
- Earn continuing education credits for professional organizations, such as InfoComm, NSCA, CEDIA, and BICSI

# Extron Control Specialist

## EXTRON CERTIFICATION

In the highly competitive A/V industry, education, training, and certification are important to the success of both individuals and companies. Like a professional license, certification instills confidence through reliable evidence of a critical set of knowledge and skills. Acquired fluency and expertise in any field saves valuable time and money, and ensures a higher level of customer service and satisfaction.

The Extron Certification Program is for A/V professionals who wish to advance their knowledge of A/V system technology, design, and configuration. The program consists of online and instructor-led training components and allows system integrators, installers, and consultants an opportunity to learn new skills, validate their skills, and gain a better understanding of the latest technologies and solutions.

## EXTRON CONTROL SPECIALIST PROGRAM

The Extron Control Specialist Certification program is designed to prepare individuals to successfully maintain and deploy customized A/V control systems across the entire organization. It is built on our popular Extron A/V Associate and Extron Control Associate Certifications, which include intensive training on A/V technologies, products, software, and applications. Students can expect a challenging series of educational modules focused on control system customization, advanced device communications, troubleshooting, and remote system management. Students who successfully complete this level of certification will be prepared to deploy and manage customized Extron control systems and software for enterprise applications.

## AUDIENCE

This program is ideal for individuals who will be required to install, configure, operate, manage, and troubleshoot A/V control systems, including design engineers, system integrator installers, system integrator project managers, control system programmers, and industry professionals. A background of 2-5 years of A/V control system design and installation experience is recommended.

## PREREQUISITES

Successful achievement of the Extron Control Associate Certification is required. A strong working knowledge of Extron GUI Configurator and Global Configurator software is recommended.

## DELIVERY METHOD

The Extron Control System Specialist School is available through a combination of online course material and instructor-led training. To achieve certification, students who complete the courses must also pass an Extron-proctored hands-on exam.

## COURSE CONTENT

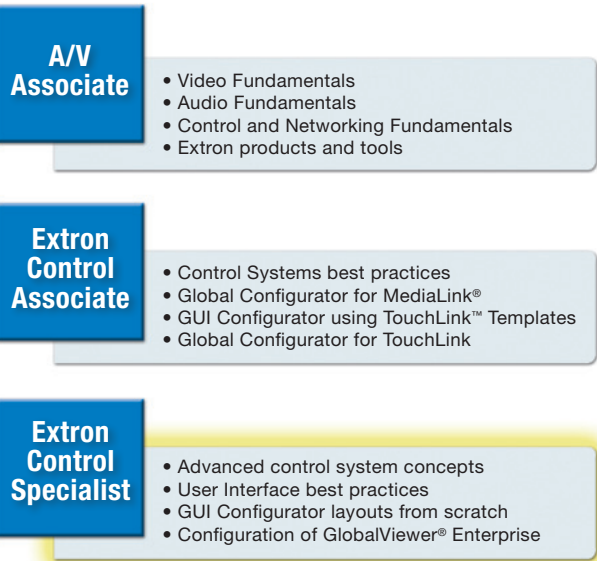

The Control System Specialist program consists of the following general categories:

- Development of control interfaces from scratch using Extron GUI Configurator software
- Advanced configuration using Extron Global Configurator
- A/V resource management using Extron GlobalViewer® Enterprise
- Networked systems design and troubleshooting
- Control system design
- GUI design best practices

## WHERE CAN I FIND MORE INFORMATION?

Contact your Extron Support Representative. A schedule of available courses and certification opportunities are available from your Extron Representative or by visiting [www.extron.com/training](http://www.extron.com/training).
