CableCover F55

UNDER-TABLE CABLE WRAP FOR CABLE CUBBY F55 SERIES ENCLOSURES

The Extron **CableCover F55** is a sophisticated cable management system that mounts below Cable Cubby® F55 and Cable Cubby F55 Edge enclosures. This CableCover™ system prevents accidental disconnects, minimizes cable tangles, and improves environment aesthetics. It conceals the AV cables and/or standard Extron Retractor Series modules below the surface. The CableCover F55 is available in a black finish.

▶ **Under-table cable wrap for improved cable management, protection, and aesthetics**

▶ **Compatible with Cable Cubby F55 Edge and Cable Cubby F55 enclosures**

▶ **Minimizes cable tangles and prevents accidental disconnections**

▶ **Features tie-down openings for cables and Extron PS Series power supplies and/or other compact Extron devices**

▶ **Available in a black tear-resistant polyester fabric construction**
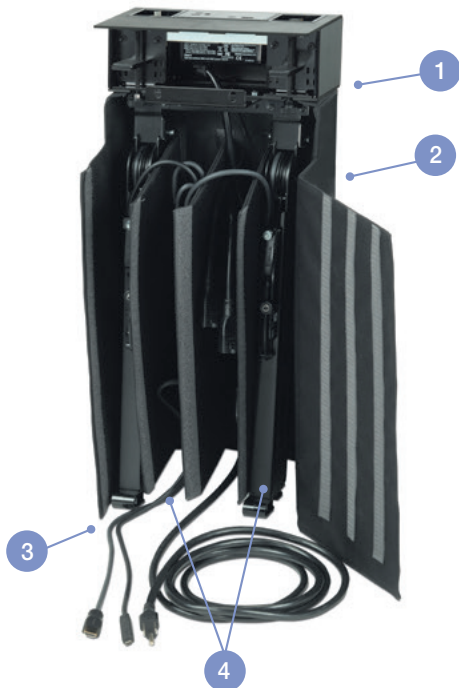

Extron

DESCRIPTION

The Extron **CableCover F55** is an elegant under-table cable management system that mounts below select Cable Cubby F55 series enclosures. Wrapping around the base of the enclosure, it improves cable management, prevents accidental disconnects, and minimizes cable tangles. Its four individual channels accommodate four AV cables or a single standard Extron Retractor module per channel. Tie-down openings allow secure mounting of the cables and/or compact devices such as an Extron PS Series power supply. It is aesthetically pleasing, with internal supports that maintain the shape of the CableCover. To facilitate cable runs to a floor box, pass-through openings are at the bottom of the wrap, streamlining cable routing and connection. It installs without tools. The CableCover F55 is constructed of a black tear-resistant fabric.

To install, simply match each fastener to the corresponding opening on the Cable Cubby and apply pressure to snap into place.

KEY FEATURES

1. Durable integrated fasteners secure the wrap to the enclosure without tools

2. Internal supports maintain the shape of the wrap

3. Cable pass-through openings streamline use with floor boxes and outlets

4. Four individual channels accommodate up to four AV cables or one standard Retractor module per channel
