Extron HDMI, VGA, and DisplayPort Show Me™ cables are the user interface for the TeamWork® collaboration system. Operation is simple and convenient: Connect the Show Me cable to your source device and press the Share button to share your content on the main presentation display. Show Me cables meet Section 508 accessibility standards and are certified for use with the AVEdge™ 100 and Cable Cubby® enclosures. Fixed sources, such as a desktop PC, Blu-ray Disk Player, videoconference system, or an Extron ShareLink 250 Series Wireless Collaboration Gateway or Apple TV® receiver, can also be used in a TeamWork system application. Please visit **www.extron.com** for additional information and full product specifications, or contact your Extron representative.

HDMI SM Show Me Cable
TeamWork Cable for High Speed HDMI Signals

Features

▸ Supports computer and video signals up to 4096x2160 at 60 Hz

▸ Share button lights as it switches

▸ 24" (60 cm) control/tally pigtail for ease of installation

▸ Available in 6' (1.8 m) and 12' (3.6 m) lengths

MODEL	VERSION	PART#

MDP-HDMI SM/6	6' (1.8 m)	26-690-06
MDP-HDMI SM/12	12' (3.6 m)	26-690-12

Overview

TeamWork Show Me cables are designed for use with mobile or temporary collaboration devices, such as laptops and tablets. Often, though, collaboration systems also need to support fixed sources, such as a: desktop PC, Blu-ray Disk player, videoconference codec, or an Extron ShareLink 250 Series Wireless Collaboration Gateway or similar device.

TeamWork Solution

The Extron Contact Closure Remotes provide the ideal user interface for selecting fixed or wireless sources in a TeamWork Collaboration System. The CCB 30 mounts in a Cable Cubby 700 enclosure and features switches with LED ring lights, which provide visual feedback on the active switch. The switches act as Share buttons for the fixed or wireless sources, similar to the Share buttons on the Show Me cables. When a compact enclosure is required, the Cable Cubby 500 is available with an integrated CCB 30. For systems using an existing enclosure to house the Show Me cables, a CCR 30 provides three individually configurable switches in a separate button panel that can be mounted near the enclosure.
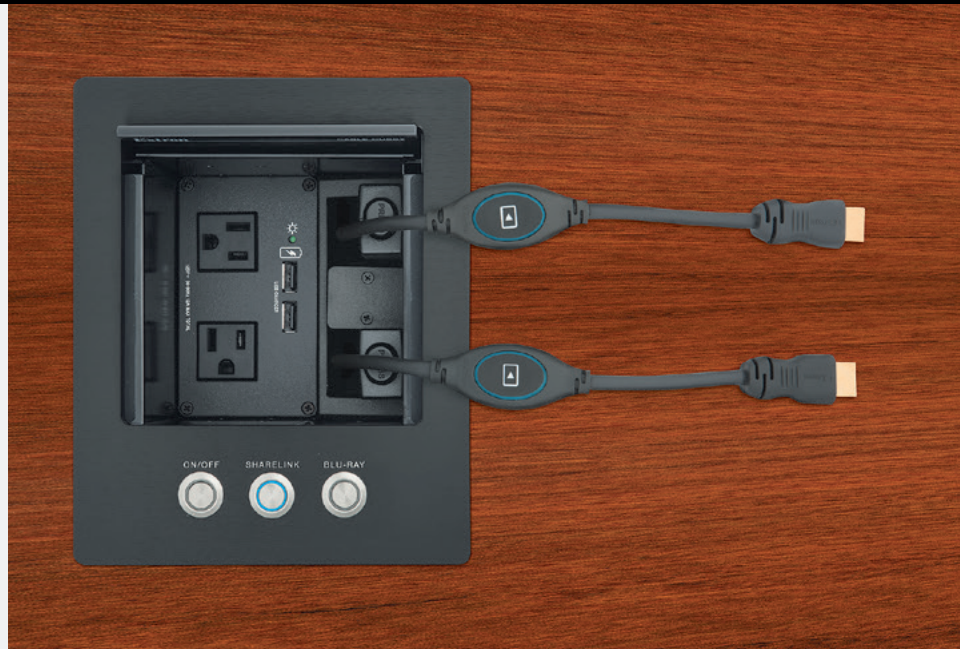

MODEL	VERSION	PART#
CCB 30	Three LED switches, Cable Cubby	70-1124-02
Cable Cubby 500 CCB	Black w 3 Buttons - AC Module Not Included. .	70-1125-02
CCR 30	3 LED switches, black	60-1446-02
