

Extron and Yealink

SCALABLE MEETING SOLUTIONS FOR MODERN WORKSPACES

Extron and Yealink are creating simple, powerful control and collaboration options for modern workspaces. With these scalable solutions, Extron provides integrated room automation, audio, and signal extension capabilities with the Yealink MCore Mini-PC, Microsoft Teams Rooms®, and Zoom Rooms™ solutions. Our collaboration with Yealink brings Extron audiovisual control capabilities to the Yealink MCore Mini-PC providing complete AV and conferencing control across the enterprise.

Now, a simple tap on the Yealink Touch Panel can control call volume for the room as well as send commands that trigger automation events for display control, shades, lighting, and more.

As part of this conferencing, control, and automation ecosystem, occupancy sensors can also be added to automate system power to turn on displays when participants enter a room and turn them off when the room is empty.

Extron

Yealink

KEY FEATURES

- ▶ Scalable Zoom Rooms and Microsoft Teams Rooms Solutions – Enable rooms of all sizes with capabilities to switch, distribute, extend, stream, enhance audio, and control AV signals.
- ▶ Room Automation – Integrate automatic system and display controls using Extron control systems and sensors.
- ▶ Simplified Room Control – Provide all room and video conferencing controls including one touch meetings with a single Yealink Touch Panel.
- ▶ BYOD Options – Provides flexibility to use conferencing platform of choice while leveraging all room resources.
