Wayfinding Interface
Easily Find and Book a Meeting Space

The TLSI 201 is the latest addition to the Extron Room Scheduling solution and is an interactive wayfinding interface that provides real-time meeting space availability, status, room booking, and location information using a centralized display. Designed to connect directly with Extron Room Scheduling panels, users can now locate and book meeting spaces for the day or week on a grid or map view. Configured with free Extron Room Agent software, it requires no additional programming or external processors.

- Meeting space information can be displayed on a grid or map view
- Simple customization for light and dark themes, logos, and welcome message
- Flexible information fields can be turned on or off
- PoE+ Compatible - eliminates the need for bulky local power supplies
- Ideal for use with third-party 40” or larger 1080p touchscreens
- Connects directly with TouchLink® scheduling panels
