Setting the New Standard in 4K Fiber Optic Distribution

- Reliable extension, distribution, and switching of 4K/60 video, audio, USB, and control over fiber optic cabling
- Advanced audio processing and routing at the matrix with Dante integration, DMP expansion, and local analog audio inputs and outputs
- Supports mathematically lossless 4K/60 4:4:4 video over one fiber or uncompressed 4K/60 4:4:4 video over two fibers
- Complete enterprise-level control via Ethernet RS-232 insertion at the matrix and extension of the control signal to remote endpoints over fiber
- Matrix I/O sizes from 8x8 up to 320x320
- Advanced 24/7 system monitoring and hot-swappable modular design
- HDCP 2.3 compliant
The Extron FOX3 Series is the industry-leading family of high performance matrix switchers and extenders for complete, end-to-end digital distribution and switching of 4K/60 video, stereo audio, USB, control, and 3D sync over fiber optic cable. This enterprise platform supports HDMI 2.0 data rates up to 18 Gbps and is HDCP 2.3 compliant for the secure transmission of uncompressed 4K or mathematically lossless 4K video to any remote location. All FOX3 extenders support native 4K/60 4:4:4 resolutions and Deep Color up to 12-bit. Select models feature built-in USB for KVM applications while Extron-exclusive Vector™ 4K scaling technology ensures the optimal image quality. Delivering exceptional reliability and advanced capabilities, FOX3 Systems meet the demands of any mission-critical environment.

Designed and engineered to the highest standards, the FOX3 matrix switchers work with all FOX3 extenders for secure delivery of video resolutions up to 4K/60 with full 4:4:4 chroma sampling to any location.

All FOX3 matrix switchers have successfully completed interoperability and information assurance testing for use in government applications and other mission-critical environments.

FOX3 matrix switchers have advanced audio capabilities, including DMP and Dante integration to maintain audio transparency and to provide the scalability required by larger audio systems.

Secure FOX3 Systems are designed for mission-critical applications, including government, military, medical, entertainment, education, and any other environments that require secure distribution of high-quality AV signals. Priority Switching and Secure Partitioning are built into the platform to enable multiple classification levels and protect sensitive information during distribution. In addition, integrated USB signal routing through the matrix switcher simplifies integration in KVM applications while advanced audio capabilities ensure pristine audio and add design flexibility.
Five FOX3 matrix frames, expandable from 8x8 to 320x320 depending on the selected models, work with all FOX3 extenders to deliver 4K/60 video along with audio, control, USB and 3D sync signals to any remote location. Three HDCP-compliant extender series are available for maximum design flexibility, all supporting HDMI 2.0 data rates up to 18 Gbps and Deep Color up to 12-bit. Select models support built-in USB extension and Extron-exclusive Vector 4K scaling technology.

**Extron Vector 4K Scaling Technology**

Vector 4K was developed internally by Extron’s expert team of signal processing engineers. Extron engineers have crafted patented image processing technologies that set the industry benchmark for visual performance. Features such as bicubic scaling, 30-bit color depth, and 4:4:4 chroma sampling ensure very high image quality while preserving detail present in the original source material.

FOX3 receivers with Vector 4K scaling offer a variety of convenient, user-friendly features. Aspect ratio control and dynamic vector-based test patterns are just a few of the many standard product features that streamline integration and optimize system performance.
FOX3 SYSTEMS

Complete Audio System Integration

The FOX3 Systems provide leading-edge audio functionality, including audio switching and breakaway, embedding/de-embedding, DMP expansion, Dante integration with AES67 support, as well as local analog audio insertion and extraction. The DMP expansion port allows the fiber matrix to be linked to an Extron DMP Plus audio DSP processor using a single shielded CAT 6 cable which provides 16x16 I/O channel transport between the two devices. Native integration with Dante provides bidirectional digital audio transport for up to 32 stereo-channels over a local area network using standard Internet protocols.

Centralized Configuration and Control

FOX3 matrix switchers offer convenient local and remote system access for configuration, operation, and monitoring through the front panel USB configuration port, rear panel RS-232 serial control port, and Ethernet control port. FOX3 Matrix Switchers also provide the insertion and extraction of RS-232 control data from the Ethernet port to the transmitters and receivers over the fiber optic cable. This allows comprehensive control of endpoint devices without needing additional cabling.
**Priority Switching for Multi-Level Classification**

All FOX3 matrix switchers provide two methods that can be used to ensure sensitive data is properly segregated and protected – Priority Switching and Secure Partitioning. Priority Switching is useful in systems with multiple security classification levels. Priority Switching assigns a security level from one to six for each input, with six being the highest level. An output can only be tied to an input at the same security level or lower, preventing unauthorized access to sensitive data. For example, an output at security level five can be tied to inputs that are security level five or lower. However, an output at level one, the lowest level, can only be tied to inputs that are also level one.

**Secure Partitioning for Segregating Sources and Destinations**

FOX3 Systems feature Secure Partitioning to prevent unauthorized access to sensitive information. Secure Partitioning enables the matrix switcher to be divided into smaller sub-switchers for segregating sources and destinations. Sources can only be routed to destinations within the same partition. Any attempt to tie an input and output in different partitions is prohibited. Up to 6 partitions are available. Secure Partitioning is useful for separating secure and unclassified data. Priority Switching can also be applied to each partition for multi-level classification systems.
I/O sizes from 8x8 up to 320x320
Each FOX3 matrix switcher can be populated with I/O boards to support customized system configurations.

Switches 4K/60 video, audio, USB, control, and 3D sync over fiber optic cable
Enables high quality signal switching and long-haul transmission over multimode or singlemode cable.

Supports mathematically lossless 4K video up to 4096x2160 at 60 Hz with 4:4:4 chroma sampling over one fiber
Provides high reliability and maximum performance on economical cable infrastructure.

Supports uncompressed 4K video up to 4096x2160 at 60 Hz with 4:4:4 chroma sampling over two fibers
Delivers pixel-for-pixel transmission of 4K/60 video signals to ensure optimal image quality.

Analog audio insertion and extraction
Local stereo audio inputs can be routed to any audio output. Local stereo audio outputs provide audio from any audio input.

Audio breakaway
Offers the capability to separate an embedded audio signal from its corresponding video signal for independent routing.

64x64 Dante I/O audio networking with Dante Domain Manager and AES67 support
Two integrated Dante ports at the matrix support up to 32 stereo inputs and 32 stereo outputs.

Audio embedding and de-embedding
Any two-channel PCM audio signal can be embedded into any output signal, including the analog return audio signal.

Modular, field-upgradeable, and hot-swappable design
Additional input and output boards may be added at any time for quick and easy upgradability to support system expansion or new technologies.

Secure Partitioning segregates sources and destinations in a secure environment
Priority Switching prevents unauthorized access to sensitive data in a secure environment
RS-232 insertion from the Ethernet control port
Signals can then be transmitted to remote endpoints to allow complete system level device control without additional cabling.

Advanced computer-aided diagnostics
Provides 24/7 self-diagnostics of I/O boards, power supply voltages, fiber links, and overall functional status of the matrix switcher.

Ethernet monitoring and control
Can be proactively monitored and managed over a LAN, WAN, or the Internet, using standard TCP/IP protocols.

Secure Ethernet communication using SSH - Secure Shell protocol
Supports SSH, ensuring communication between the control system and the matrix is encrypted.

Key Minder® continuously verifies HDCP compliance for quick, reliable switching
Authenticates and maintains continuous HDCP encryption between input and output devices to ensure quick and reliable switching in professional AV environments.

Bidirectional RS-232 insertion for AV device control
Bidirectional RS-232 and IR control pass-through enables a remote device to be controlled without the need for additional cabling. Two fibers are required for bidirectional communications.

HDCP 2.3 compliant
All FOX3 extenders are HDCP 2.3 compliant.

JITC certified
FOX3 systems have successfully completed interoperability and information assurance testing for use in government applications and other mission-critical environments.

EDID Minder® automatically manages EDID communication between connected devices
EDID Minder ensures that all sources power up properly and reliably output content for display.

Internal Extron Everlast™ power supply
Provides worldwide power compatibility, with high demonstrated reliability and low power consumption for reduced operating cost.

Supports USB 2.0 to 1.0 devices and USB 3.0 devices that can operate at USB 2.0 data rates of up to 480 Mbps
Provides USB extension, allowing connection to peripheral devices over the same fiber cable as video and audio.

Device class filtering on USB HID port restricts the range of device types to HID
Device class filtering prevents unauthorized downloading or uploading of content via the USB port in secure environments. The USB HID port is configured at the factory, such that device class filtering cannot be removed or altered in the field.

Peripheral emulation on USB HID port
Offers increased system reliability by emulating a continuous connection between the host and an HID-compliant keyboard and mouse.

Host emulation on the USB HID ports
Offers increased system reliability by emulating a continuous connection between the HID-compliant keyboard and mouse and a host.

HDCP Visual Confirmation
When HDCP encrypted content is transmitted to a non-HDCP-compliant display, a full-screen green signal is sent to the display for immediate visual confirmation that protected content cannot be viewed on that display.

LinkLicense® Support
Extron LinkLicense unlocks features that add convenience, expand system functionality, and enhance the capabilities of Extron products.
**OVERVIEW**

Compatible with all Extron FOX3 Series extenders
Provides a complete end-to-end fiber optic distribution system

JITC Certified
Successfully completed interoperability and information assurance testing

High speed, digital switching
Switches 4K/60 video, audio, USB, control, and 3D sync over fiber

Rack-mountable full rack width metal enclosure
Easily installs in standard equipment rack

Front panel USB configuration port
Enables easy system set-up without the need to access the rear panel

Primary and redundant power supply status indicators
Easily check power supply status

Ethernet monitoring and control
Enables web-based remote management, monitoring, and control

RS-232 insertion from the Ethernet control port
Provides system level device control to remote locations

Multimode and singlemode I/O boards
Configurable for short or long-haul transmission

RS-232 and Ethernet control ports
Provides connectivity for an external control system

Audio breakaway
Enables independent routing of two-channel PCM audio

Digital audio expansion port
Provides a connection to an Extron DMP 128 Plus audio DSP processor for audio system scalability

Two AC power inputs
Continuous connection to primary and redundant power

Dual redundant and hot-swappable power supplies
Provides reliability for 24-hour and mission-critical environments

Stereo analog audio I/O ports
Extract or embed analog audio

Two Dante audio ports with AE67 support
Provides digital audio connectivity for 32 stereo inputs and 32 stereo outputs
FOX3 MATRIX SWITCHERS

Common Features

• Switches 4K/60 video, audio, USB, control and 3D sync
• Compatible with all FOX3 transmitters and receivers
• Full audio integration with DMP expansion, local analog audio insertion/extraction, and Dante with AES67 support
• Modular, field-upgradeable and hot-swappable design
• RS-232 insertion from the Ethernet control port
• Multimode and Singlemode I/O boards available
• Audio breakaway, embedding/de-embedding
• Ethernet monitoring and control

FOX3 Matrix 24x
Modular Fiber Optic Matrix Switcher from 8x8 to 24x24

Unique Features

• I/O sizes from 8x8 to 24x24
• Optional redundant and hot-swappable power supply
• Rack-mountable 2U, full rack width metal enclosure

Frame rate: 24, 25, 30, 50, or 60 fps

Chroma sampling: 4:4:4, 4:2:2

Color bit depth: 8, 10, or 12 bits per color

Signal type: HDMI 2.0, HDBT 2.3

Max. video data rate: 18.0 Gbps

NOTE: Supports lossless 4K video over one fiber or uncompressed 4K video over two fibers. Supports 12-bit color bit depth for uncompressed 4K video over two fibers. When using a FOX SR scaling receiver, the scaler must be in bypass mode to pass 4K video with a 12-bit color bit depth. Subject to the maximum data rate limit. Use our calculator at www.extron.com/4Kdatarate to determine video parameters supported by this data rate.

NOTE: This product contains Class 1 laser. It meets the safety regulation of IEC 60825-1, FDA 21 CFR 1040.10, and FDA 21 CFR 1040.11.

**OPTICAL SPECIFICATIONS**

- **Number/type**: 8 singlemode or 8 multimode SFPs per board
- **Connectors**: 16 LC connectors per I/O board
- **Signal type**:
  - FOX3 Matrix 24x: 8 to 24 fiber optic signals
  - FOX3 Matrix 40x: 8 to 40 fiber optic signals
  - FOX3 Matrix 80x: 8 to 80 fiber optic signals
  - FOX3 Matrix 160x: 8 to 160 fiber optic signals
  - FOX3 Matrix 320x: 8 to 320 fiber optic signals
- **Routings**:
  - FOX3 Matrix 24x: 8 x 8 up to 24 x 24 unidirectional matrix or 4 x 4 up to 12 x 12 bidirectional matrix
  - FOX3 Matrix 40x: 8 x 8 up to 40 x 40 unidirectional matrix or 4 x 4 up to 20 x 20 bidirectional matrix
  - FOX3 Matrix 80x: 8 x 8 up to 80 x 80 unidirectional matrix or 4 x 4 up to 40 x 40 bidirectional matrix
  - FOX3 Matrix 160x: 8 x 8 up to 160 x 160 unidirectional matrix or 4 x 4 up to 80 x 80 bidirectional matrix
  - FOX3 Matrix 320x: 8 x 8 up to 320 x 320 unidirectional matrix or 4 x 4 up to 160 x 160 bidirectional matrix
- **Operating distance**:
  - Singlemode: 20 km (12.4 miles) with singlemode (SM) cables
  - Multimode: 500 m (1640 feet) with 50 µm OM4 4700 MHz bandwidth laser optimized multimode cables

**NOTE**: The system works with OM1, OM2, and OM3 fiber at reduced distances.

**NOTE**: Operating distance is approximate. These are typical distances. The maximum distance may be greater than these typical numbers depending on factors such as fiber type, fiber bandwidth, connector splinting, losses, modal or chromatic dispersion, environmental factors, and kinks.

- **Nominal peak wavelength**: 850 nm for multimode (MM), 1310 nm for singlemode (SM)
- **Transmission power**:
  - Singlemode: -5.2 dBm, typical
  - Multimode: -3.3 dBm, typical
- **Maximum receiver sensitivity**:
  - Singlemode: -12.6 dBm, typical
  - Multimode: -13.0 dBm, typical

**Audio Format**

- 24 bit uncompressed at 48 kHz sampling rate
- 2 channel LPCM

**AT PORTS — DANTE AUDIO TRANSPORT**

- **Transmission type**: Dante/AES-67, software selectable
- **Connectors**: 2 RJ-45 to Dante interface
- **Inputs**: Up to 32 stereo channels
- **Outputs**: Up to 32 stereo channels
- **Audio format**: 24 bit uncompressed at 48 kHz sampling rate
- **Latency**: Deterministic, based on user selections: 0.25 ms, 0.5 ms, 1.0 ms (default), 2.0 ms, 5.0 ms

**EXP PORT**

- **Transmission type**: Proprietary
- **Connector**: 1 RJ-45
- **Inputs**: 8 stereo channels Rx
- **Outputs**: 8 stereo channels Tx
- **Audio format**: Uncompressed, 24-bit, 48 kHz
- **EXP cable**: Shielded CAT6 up to 10 meters

**COMMUNICATIONS**

- **USB configuration port**: 1 front panel mini USB B, female
- **Standard**: Ethernet over USB
- **Serial control port**: 1 RS-232, 3.5 mm captive screw connector, 3-pole, female, rear panel

**Ethernet control**

- **Ethernet port**: 1 RJ-45 connector, female
- **Ethernet data rate**: 10/100/1000Base-T, full/half duplex with autodection
- **Protocols**: ARP, ICMP (Ping), DHCP, DNS, HTTPS, SFTP, SSH, TCP/IP, UDP/IP
- **Default settings**: Link speed and duplex level = autodection
- **IP address**: 192.168.254.254
- **Subnet mask**: 255.255.255.0
- **Gateway** = 0.0.0.0
- **DHCP** = off
- **Web server**: Up to 200 simultaneous sessions
- **7.0 MB non-volatile memory**

**Optical loss budget**

- Singlemode: +7.4 dB, maximum
- Multimode: +9.7 dB, maximum

**Maximum channel data rate**: 10 Gbps
## SPECIFICATIONS

### GENERAL

| Power supply | Internal, 2" (positive-negative), primary and redundant, hot-swappable
|              | Input: 100-240 VAC, 50-60 Hz
|              | *A redundant power supply is standard.
|              | On the FOX3 Matrix 24x, a redundant power supply is optional.
| Temperature/humidity | Storage: -40 to +158 °F (-40 to +70 °C) / 10% to 90%, noncondensing
|                   | Operating: +32 to +122 °F (0 to +50 °C) / 10% to 90%, noncondensing
| Cooling | Fan, right to left (as viewed from front panel)
| Mounting | Rack mount
| Yes |
| Enclosure type | Metal

#### Enclosure dimensions

| FOX3 Matrix 24x | 3.5" H x 17.0" W x 13.0" D (2U high, full rack wide)
|                | (8.9 cm H x 43.2 cm W x 33.0 cm D)
|                | (Depth excludes connectors and handles.
|                | Width excludes rack ears.)
| FOX3 Matrix 40x | 7.0" H x 17.0" W x 20.0" D (4U high, full rack wide)
|                | (17.8 cm H x 43.2 cm W x 50.8 cm D)
|                | (Depth excludes connectors and handles.
|                | Width excludes rack ears.)
| FOX3 Matrix 80x | 8.75" H x 17.0" W x 20.0" D (5U high, full rack wide)
|                | (22.2 cm H x 43.2 cm W x 50.8 cm D)
|                | (Depth excludes connectors and handles.
|                | Width excludes rack ears.)
| FOX3 Matrix 160x | 14.0" H x 17.0" W x 20.0" D (8U high, full rack wide)
|                | (35.6 cm H x 43.2 cm W x 50.8 cm D)
|                | (Depth excludes connectors and handles.
|                | Width excludes rack ears.)
| FOX3 Matrix 320x | 21.0" H x 17.0" W x 20.0" D (12U high, full rack wide)
|                | (53.3 cm H x 43.2 cm W x 50.8 cm D)
|                | (Depth excludes connectors and handles.
|                | Width excludes rack ears.)

#### Regulatory compliance

| CE, c-UL, C-tick, FCC Class A, ICES, UL, VCCI |
| Complies with the appropriate requirements of RoHS, WEEE. |

### Product warranty

3 years parts and labor

**NOTE:** All nominal levels are at ±10%.
