Extron Retractor SM Show Me™ cable retraction modules provide the user interface for HDMI, DisplayPort, Mini DisplayPort, or VGA sources, and PC audio and network support in the TeamWork® collaboration system. Operation is simple and convenient: Connect the Show Me cable to your source device and press the Share button to share your content on the main presentation display. At the end of the collaboration session, cables retract with the press of a button, ready for use by the next collaboration team. Retractor SM modules are engineered for long life and reliability in high-utilization environments. The modules are easy to install and work with most Extron Cable Cubby® Series/2 cable access enclosures. Please visit www.extron.com for additional information and full product specifications, or contact your Extron representative.
