DESCRIPTION

The Extron **RGB-HDMI 300 A** is a high performance RGB to HDMI scaler that converts incoming analog component video and RGBHV signals to HDMI signals. It accepts HDTV and high resolution computer-video signals up to 1920x1200, and offers multiple, selectable HDMI output rates up to 1920x1200, including HDTV 1080p/60. The RGB-HDMI 300 A also offers audio embedding so that analog audio inputs can be digitized into the scaled HDMI output. It is housed in a compact, low-profile enclosure for discreet installation behind a display or above a projector. The RGB-HDMI 300 A is ideal for applications where displays, equipped only with HDMI inputs, are to be used with sources that output analog RGB, or in an environment with an existing analog RGB and audio signal distribution infrastructure.

FEATURES
