The Extron SI 3 is a compact, full-range surface mount speaker featuring a 3" (7.6 cm) driver coupled to an exclusive conical baffle that delivers very wide room coverage, as well as wide frequency response for accurate voice and music reproduction. This System Integrator® Series speaker is ideally suited for small to medium classrooms and conference rooms, and features a durable, weather-resistant construction for use in outdoor environments.
The Extron SI 3 compact surface mount speaker features a 3" (7.6 cm) full-range driver coupled to an exclusive conical baffle that enhances coverage throughout the listening area. The driver features an incredibly wide frequency response of 75 Hz to 18 kHz, and 16 watts continuous pink noise and 32 watts continuous program capacity. An internal overload protection circuit prevents driver damage due to excessive input levels.

This System Integrator Series speaker is ideally suited for small to medium classrooms where wall space is at a premium due to projector screens, pull-down maps, and white boards. With a weather-resistant construction, the SI 3 is also at home in outdoor environments.

The exclusive conical baffle provides a broad dispersion of the mid and high frequencies in order to optimize room coverage from a compact speaker. Voice intelligibility is critical for classrooms and many other applications, and the SI 3 provides excellent voice clarity without compromising music reproduction.

Included with the SI 3 is Extron’s exclusive Patent Pending V-Lock mounting hardware, which facilitates easy, secure installations, and allows for wide 60° horizontal and 55° vertical travel.

The SI 3 is sold in pairs and is available in a black or white finish, and includes a 5 year parts and labor warranty.

**FEATURES**

- Compact full-range speaker
- 3" (7.6 cm) full-range driver with a tuned bass reflex port
- Frequency response: 75 Hz to 18 kHz
- 16 watts continuous pink noise, 32 watts continuous program
- Exclusive V-Lock mounting system included
- Internal driver overload protection
- 8 ohm nominal impedance
- Black or white high-impact, weather-resistant enclosure
- Grille and enclosure may be painted to match environment
- 5 year parts and labor warranty

**DIMENSIONAL DRAWINGS**

**SPECIFICATIONS**

**AUDIO/ACOUSTIC AND ELECTRICAL**

- Speaker type: Indoor/outdoor surface mount speaker
- Frequency range: 75 Hz to 18 kHz, -10 dB, half space
- Power capacity: 16 W continuous pink noise, 32 W continuous program
- Nominal sensitivity: 83 dB SPL, 1W, 1m, half space
- Nominal impedance: 8 ohms
- Driver: 3" (76.2 mm) paper cone
- Overload protection: Full range power limiter
- Input connector: 2 pin spring terminals

**GENERAL**

- Package: 2 speakers (1 pair)
- Temperature/humidity: Storage: -40 to +158 °F (-40 to +70 °C) / 10% to 90%, noncondensing
  Operating: +32 to +122 °F (0 to +50 °C) / 10% to 90%, noncondensing
- Mounting: Wall mountable with included wall mountable V-lock brackets
- NOTE: V-lock brackets can be angled up to 20° upward, 35° downward, 30° to the left, and 30° to the right.
- Enclosure type: Plastic, trapezoidal, with metal grille and bass reflex ports
- Enclosure outer dimensions: 8.75" H x 5.75" W x 5.6" D (22.2 cm H x 14.6 cm W x 14.2 cm D)
- Product weight: 4.0 lbs (1.8 kg) each
- Shipping weight: 13 lbs (6 kg) per pair with mounting kit package
- Warranty: 5 years parts and labor

**NOTE:** All nominal levels are at ±10%.

**EXCLUSIVE FEATURES**

*Extron Conical Baffle*
A compact surface mount speaker is a logical choice when wall space is at a premium. To address the issue of beaming in the midrange and high frequencies that can be found in a small, compact speaker, the SI 3 has been designed with a 3” full-range driver that is acoustically coupled to an Extron exclusive conical baffle. This baffle serves as a waveguide to help create a wide dispersion profile. With this very broad conical spreading of the mid and high frequencies, two SI 3 speakers in a small to medium classroom should ensure consistent volume levels for everyone while delivering increased intelligibility and accurate music reproduction.

*Extron V-Lock Speaker Mounting System*
Integrators are confronted with a number of challenges in the successful installation of surface mount speakers. To address these challenges, Extron has developed V-Lock, an exclusive, Patent Pending speaker mounting system, included with each SI 3 surface mount speaker. V-Lock simplifies installation and substantially reduces the effort required to place and correctly position wall-mounted speakers, while also offering theft deterrence. V-Lock is comprised of two components, one that is mounted to the wall, and the other which is integral to the speaker.

- **Easily mounts like a picture frame** – After mounting the V-Lock bracket to the wall, position the speaker so that the “V” rails on the back slide into the “V” channel of the wall mount. The process is akin to installing a picture frame onto the wall. The speaker is now fully supported by the mounting hardware, so that a balancing act is no longer necessary.

- **One-step positioning and locking** – Both hands are now free to orient the speaker as desired. Then, using the included tool, fully secure the speaker to the mounting hardware by tightening the V-Lock mount through the slot on the front grille. The subtle, low profile Extron badge covers the slot after installation, hiding it from view.

- **Wide positioning arc** – V-Lock offers wide 60° horizontal and 55° vertical travel, so that the speaker can be easily positioned to achieve optimized sound coverage.

- **Theft-deterrent design** – The V-Lock mounting hardware is integral to the speaker, making simple detachment impossible. Access to the hardware is possible only through the front baffle slot, which is concealed. Additionally, only the included tool will work with the hardware. Therefore, V-Lock provides an effective solution for deterring theft.
