

# Crimp Connectors and Accessories (continued)

BNC, RCA, and F-Type Crimp Connectors; Replacement Components, Strain Reliefs & Heat Shrink

## Strain Reliefs

Strain Reliefs for MHR and M59 Crimp Connectors

### DESCRIPTION

Extron carries professional BNC **Strain Reliefs** for Extron's MHR - Mini High Resolution and M59 - Mini 59 Cables. The rough handling that cables are subjected to in a typical A/V environment can cause significant damage, resulting in poor or inconsistent video performance. The point at which the cable terminates to the connector is most vulnerable. With BNC strain reliefs lessening the pressure, cables are less likely to be damaged. BNC strain reliefs also have a sleek design, adding a finished look to the cables. The MHR strain reliefs are available by individual color and assorted colors in quantities of 50 or 1,250. The assorted package of strain reliefs includes red, green, blue, black, and yellow strain reliefs only. White strain reliefs are not included.

## Ferrite Bead

Ferrite Bead for Use with MHR - Mini High Resolution Cables

### DESCRIPTION

The Extron **Ferrite Beads** are designed for use with MHR - Mini High Resolution cables. Extron Ferrite Beads feature a dowel-like cylinder with a hollow core through which the MHR cable passes. The bead is placed near the end of the cable and is used to reduce EMI - electromagnetic interference and RFI - radio-frequency interference. Each bead is 1.12" (28.6 mm) long x 0.68" (17.5 mm) wide with a 0.37" (9.5 mm) hollow inner core.
