

HDMI and DVI Cables

The Extron HDMI and DVI cables offer interconnection between HDMI and DVI devices. They are available in four styles: **HDMI to DVI**, **HDMI male to HDMI male**, **DVI male to DVI male (single link)**, and **DVI male to DVI male (dual link)**, in various lengths from 3 feet up to 200 feet (0.9 m up to 61 m) [HDMI to DVI cables are from 3 feet to 50 feet (0.9 m up to 15.2 m)]. They carry uncompressed HDTV high definition digital video as well as a control signal on a single cable. The HDMI male to HDMI male cable fully supports HDMI 1.3 Category 2 performance for cable lengths of 3 feet, 6 feet, and 12 feet. HDMI and DVI cables longer than 75 feet should be used with the Extron DVI DL 101, DVI 101, or HDMI 101 Cable Equalizer.

- Single link DVI cable supports up to 1920 x 1200 at 60 Hz.
- Dual link DVI cable supports up to 2560 x 1600 at 60 Hz.

- NOTE**
- Pin 13 of the HDMI and pin 8 of the DVI are connected for passing CEC signals.
 - Cables 12 feet or less in length are constructed with 24 AWG wire. Cables longer than 12 feet are constructed with 22 AWG wire.

HDMI to DVI Adapters

The Extron HDMI to DVI adapters offer interconnection between HDMI and DVI cables and devices. They pass through all the HDTV and computer signals of a single link HDMI and DVI, including digital video, digital audio, EDID (DDC), HPD, CEC, and HDCP. All the contact pins are gold plated for high performance and reliability; the male side has thumb screws, and the female side has hex nuts for attachment.

- NOTE** Pin 13 of the HDMI connector and pin 8 of the DVI connector are connected for passing CEC signals.
