ShareLink® Pro WFA 100

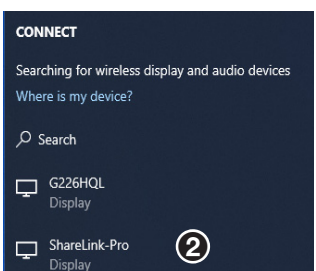

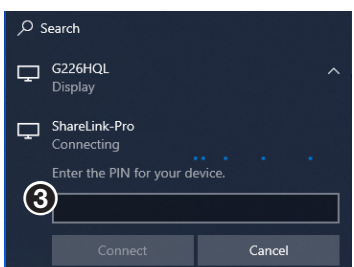

The ShareLink® Pro WFA 100 is a Wi-Fi Miracast™ adapter that enables anyone to share content from a Windows® 10 device to a ShareLink Pro device without installing any software.

To connect a Windows 10 device using the WFA 100:

1. Connect the WFA 100 adapter to the front panel USB port on the ShareLink Pro (❶).
2. Press the **<Windows + K>** keyboard shortcut on the Windows 10 client device. This opens a list of Miracast capable devices (❷).
3. Select the desired Sharelink Pro unit from the list, and enter the display code if prompted (❸).

NOTES:

- The ShareLink Pro 1100 and ShareLink Pro 2500 each require a local power supply. The 12 VDC 4.2A Extron power supply (part number 28-394-07LF) is recommended.
- See the *Miracast Setup Guide*, available on the **Extron website**, for more information on Miracast, configuration options, and troubleshooting.

Complies with IMDA Standards DA107104
